INDUSTRIAL DISPUTES, OCTOBER 1970 (PRELIMINARY)

This bulletin, the first in a monthly series, contains statistics of industrial disputes for the month of October 1970 and some previous periods. These monthly bulletins will provide earlier information on industrial disputes than that appearing in the detailed quarterly mimeograph, "Industrial Disputes" (Reference No. 6.6), the latest issue of which relates to the quarter ended 30 September 1970. Statistics for October 1970 shown in this publication are subject to revision and revised figures may be published in future issues. Figures for months to September 1970 are final.

2. The statistics of industrial disputes refer only to disputes involving a stoppage of work of ten man-days or more. Workers involved include workers directly and indirectly involved in disputes. Workers indirectly involved are employees thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute. Particulars of some stoppages (e.g. those involving a large number of establishments) may be estimated and the statistics therefore should be regarded as giving a broad measure of the extent of stoppages of work (as defined).

3. Stoppages of work at different points of time and at different establishments due to the same cause may be regarded as one industrial dispute. However an industrial dispute occurring in more than one State is counted as a separate dispute in each State. A dispute involving workers in more than one industry group in a State or Territory is counted once only in the number of disputes - in the industry group that has the largest number of workers involved; but workers involved, working days lost and estimated loss in wages are allocated to their respective industry groups. Disputes not settled at the end of a year are included as new disputes in the figures for the following year. The monthly statistics refer to all disputes operative in the month, including those disputes that commenced in previous months. In Table 1 details of the number of disputes and workers involved are shown separately for disputes beginning in the month and for all disputes.

4. For further information about statistics of industrial disputes see Labour Report No. 53, 1967.

5. Any discrepancies between totals and sums of components are due to rounding.
